Professional Summary

Aspiring Data Analyst with hands-on experience in Excel, SQL, Python, and Power BI for solving business problems through data. Skilled in data cleaning, transformation, modeling, dashboard development, KPI reporting, and storytelling with data. Passionate about converting raw datasets into actionable insights that support business decision-making across analytics, finance, operations, and customer domains.

Technical Skills

Analytics: Advanced Excel, Power Query, DAX, Power BI, Dashboard Development, Data Modeling

Programming & Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, SQL (MS SQL, MySQL, SQLite), Git, GitHub, VS Code, Generative AI

Soft Skills: Communication, Leadership, Storytelling, Problem Solving

Projects

Road Accident Analysis — Excel, Python, Power BI

- Analyzed road accident data to identify trends in casualty severity, vehicle types, road conditions, light conditions, urban vs. rural areas, and monthly accident patterns.
- Performed data cleaning, transformation, and exploratory data analysis (EDA) using Excel, Power Query, Python (Pandas, Matplotlib, Seaborn), and SQL before creating interactive Power BI dashboards with DAX measures and KPIs.
- **Tech Stack:** Excel, Power Query, DAX, Python, Pandas, Matplotlib, Seaborn, Power BI
- **Links:** [Excel Repo](#) — [Python Repo](#) — [Power BI Repo](#) — [Live Dashboard](#)

HR Employee Attrition Analysis — Power BI

- Developed an interactive HR analytics dashboard to analyze employee attrition across departments, education fields, age groups, gender, job roles, salary slabs, and years at the company.
- Used Power Query for data preparation and DAX to create KPIs, enabling dynamic filtering and visualization of workforce trends.
- **Tech Stack:** Power BI, Power Query, DAX
- **Links:** [GitHub](#) — [Live Dashboard](#)

Customer Trends Analysis — SQL, Python, Power BI

- Analyzed customer purchasing trends using SQL and Python by performing data cleaning, querying, and exploratory data analysis to identify sales and customer behavior patterns.
- Built interactive Power BI dashboards to visualize KPIs, customer trends, and business performance metrics for data-driven reporting.
- **Tech Stack:** SQL, Python, Pandas, Power BI

Education

JECRC University, Jaipur 2022–2026
Bachelor of Technology in Computer Science Engineering

TATA DAV Public School, Ramgarh 2022
Senior Secondary (PCM), CBSE

Certifications

- IBM SkillsBuild Certificate
- Microsoft Power BI Microsoft Learn
- Cisco Data Analyst Certificate

Additional Information

Languages: English, Hindi
